Cosentino® Sustainability

At Cosentino® we approach sustainability as a collective commitment that stems from the individual involvement of those that are part of Cosentino®.

Our continuous improvement efforts involves a constant analysis of our entire value chain – from the procurement of raw materials to the delivery of end products to customer.

At Cosentino® we are strongly committed to the 2030 Agenda promoted by the United Nations. The company, in view of its position as a global leader in the production and distribution of innovative surfaces for decoration and architecture from its Almería base, is committed to driving the local and global sustainability efforts.

→ Olive trees in the Cosentino®'s industrial park

→ LED lighting in the Cosentino®'s industrial park

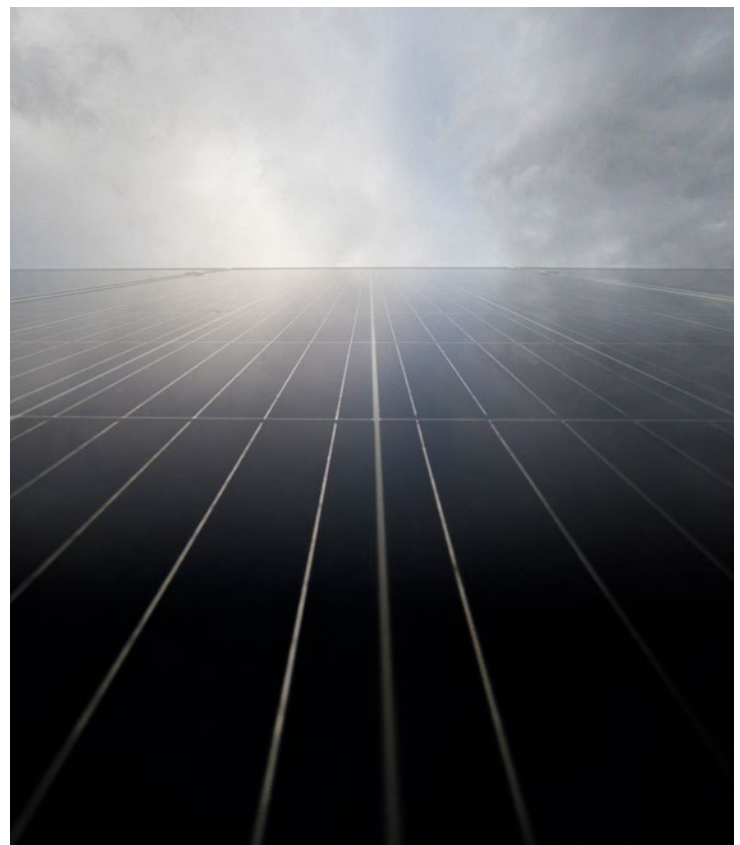

→ Photovoltaic installations at Cosentino®

Energy

Energy efficiency and the use of renewable energy sources are the two key elements of our strategy to minimise the impact of our activities.

First of all, 100% of our energy consumption comes from renewable energy sources. Furthermore, by 2023 we aim to achieve 15% self-consumption of energy.

On the other hand, the constant improvement of our processes and machinery allows us to achieve a high level of energy efficiency, which translates into an 8% reduction of our electricity consumption in our production processes.

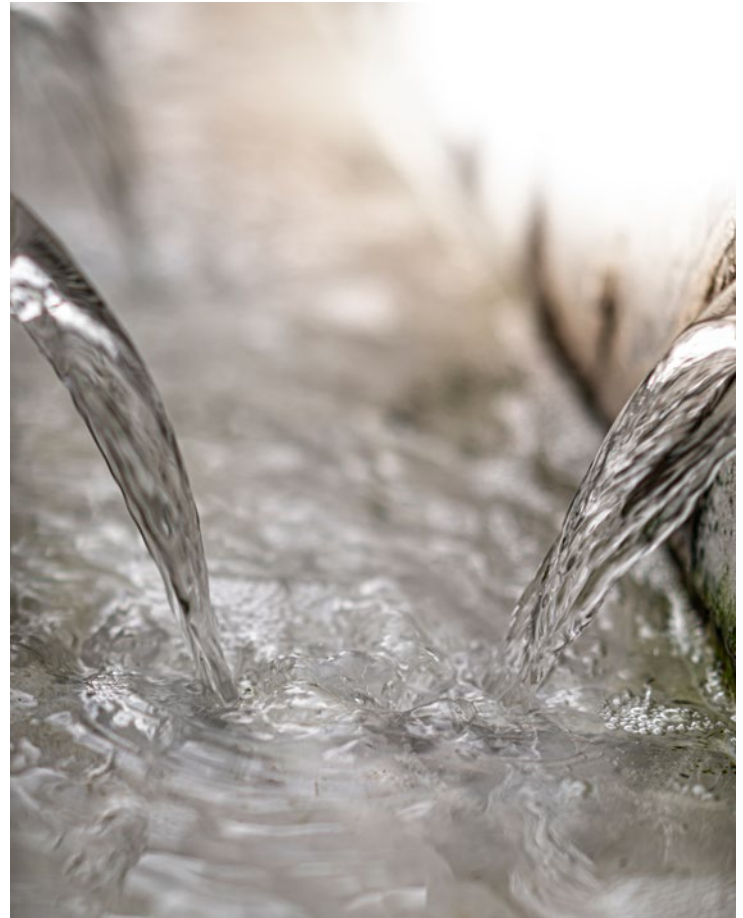

Water

Since our inception, we have appreciated the importance and understood the challenges of proper water management.

This has motivated us to implement a sustainable use policy maximising the efficient use of water resources in the different production processes.

We use cutting-edge technology to achieve 99% recycled water in all our production processes in the Cosentino®'s industrial park.

Additionally, we use 100% of surplus water to irrigate green areas.

Materials

We are aware of the importance of making the most of the materials we work with, both from the beginning of their life cycle to the end of the value chain.

With this goal in mind, in recent years we have embarked on an ambitious R&D project called 'Circularity' to reuse the materials from which we manufacture our products.

Another action is the disruptive HybriQ+® technology that brings about the new generation of Silestone®. HybriQ+® contains a minimum of 20% recycled materials and is manufactured using only renewable energy and 99% recycled water.

Carbon neutrality: Sustainable Development

Cosentino® Group considers sustainable development as an essential commitment in the company's growth strategy, with regard to the respect and protection of the environment.

We address aspects related to the efficient use of natural resources, proper waste management, atmospheric emissions, discharges and other potential impacts in order to make sustainable use of natural resources and protect biodiversity and ecosystems.

At Cosentino® we are strongly committed to the 2030 Agenda promoted by the United Nations and the Local Action Plan promoted by the Spanish Government.

As a demonstration of our commitment, we have managed to offset the 42,532 tonnes of CO₂ emissions resulting from one year of Dekton® production, thus obtaining the Zero Carbon Footprint label for the entire product life cycle in 2019 for all Dekton® brand products.

In addition, the Sunlit Days series by Silestone® is the brand's first collection to achieve this certification.

We reduce our impact

We are committed to energy efficiency, emissions reduction and sustainable mobility to minimise our impact.

- **Energy efficiency:** it is a priority objective for Cosentino® to reduce energy consumption in the production process and in the general Group activity, which is why we have managed to obtain 100% of the electricity we use from renewable sources.
- **Emission reduction:** 2.8 million euros have been invested in the implementation of an energy management and monitoring system for the heat systems, which allows heat from the Dekton® kilns to be recovered and used in the dryers, thus reducing emissions.
- **Sustainable mobility:** we have recently joined the 'Plan Sumamos Salud + Economía' under which we have a Mobility Policy that helped us to avoid the emission of 230 TCO₂ in 2018.

We calculate our carbon footprint

It is an external body that verifies the calculation and the results of the carbon footprint that are submitted to the Spanish Ministry for Ecological Transition and Demographic Challenge (MITECO, in Spanish), which is responsible for approving and registering our Footprint, becoming part of the 'Spanish registry of carbon footprint, offsetting and carbon dioxide absorption projects' of the Spanish Climate Change Office (OECC, in Spanish), whose results are made public as an exercise in transparency.

This calculation uses energy and/or fuel consumption data, as well as raw material consumption data collected from all **Group subsidiaries** (Centres, Workshops, Cities, HUBs, HQ, etc.) with a view to offset these emissions.

We offset our emissions

To achieve carbon neutrality in Dekton®, at Cosentino® **we offset our emissions over the entire product life cycle** (scopes 1+2+3) by investing in GHG emission reduction projects.

For this purpose, we identify those projects that meet the requirements for responsible offsetting and that, in turn, have a strong social dimension that contribute to the achievement of the **Sustainable Development Goals of the UN's 2030 Agenda**.

The project selected to offset the 42,532 tonnes of CO₂ emissions, resulting from one year of Dekton® production, has a direct impact on sustainable development by **supporting the local economy, providing training and job opportunities**.

Reimagine your space

Home spas

Cosentino® Bathroom

The latest
technology for
sustainable
and design
bathrooms.

At Cosentino® we have developed a wide collection of surfaces and bathroom elements, such as washbasins and shower trays, in different finishes, textures, formats and featuring the latest innovation to bring any project to life.

Innovation and design for the bathroom.

Create a unique experience in which the most beautiful and functional Cosentino® surfaces transform warm and exclusive spaces.

From wall and floor claddings in different yet perfectly balanced formats, colours and textures, to attractive washbasins and shower trays, carefully designed with great attention to detail and simplicity.

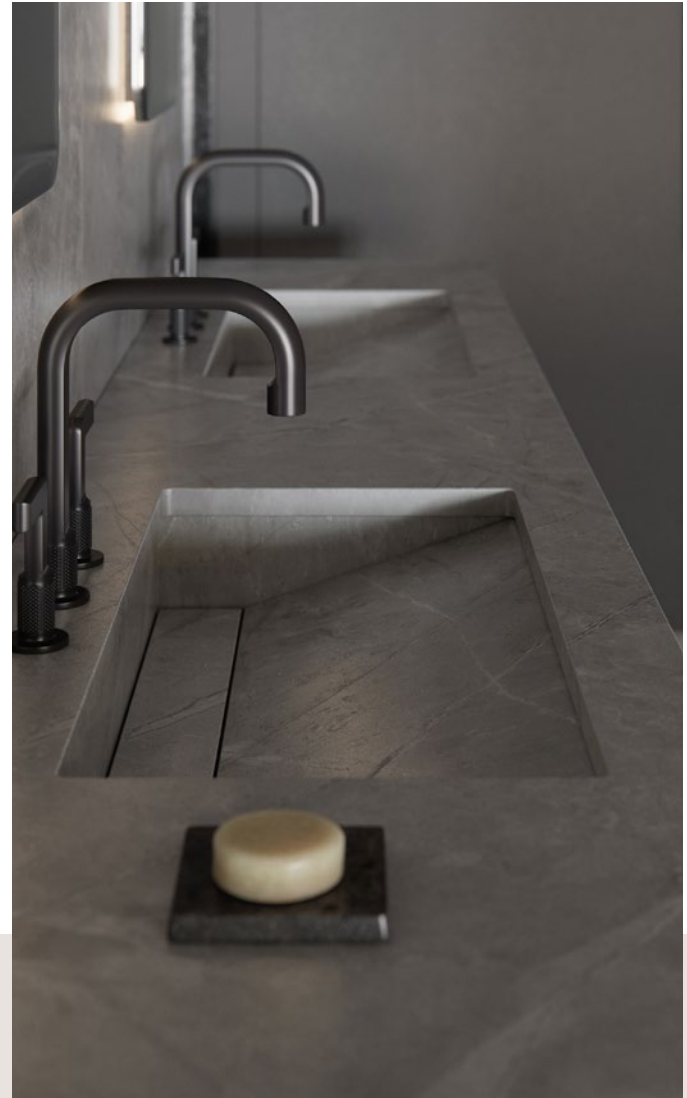

Solutions of great aesthetic and functional value to suit every requirement and style of bathroom, which redefine the way in which we experience such a personal space and feeling of well-being.

XXL format

Large format and minimal joints.

Bathrooms are exposed to constant activity. Using a high quality surface for flooring and cladding reduces joints and ensures hygiene and cleanliness. In addition, the strategically placed XXL slabs make the room larger, creating the feeling of a larger bathroom.

Architect: Pedro Francisco
Interior design: Alexia Martínez

Shower trays

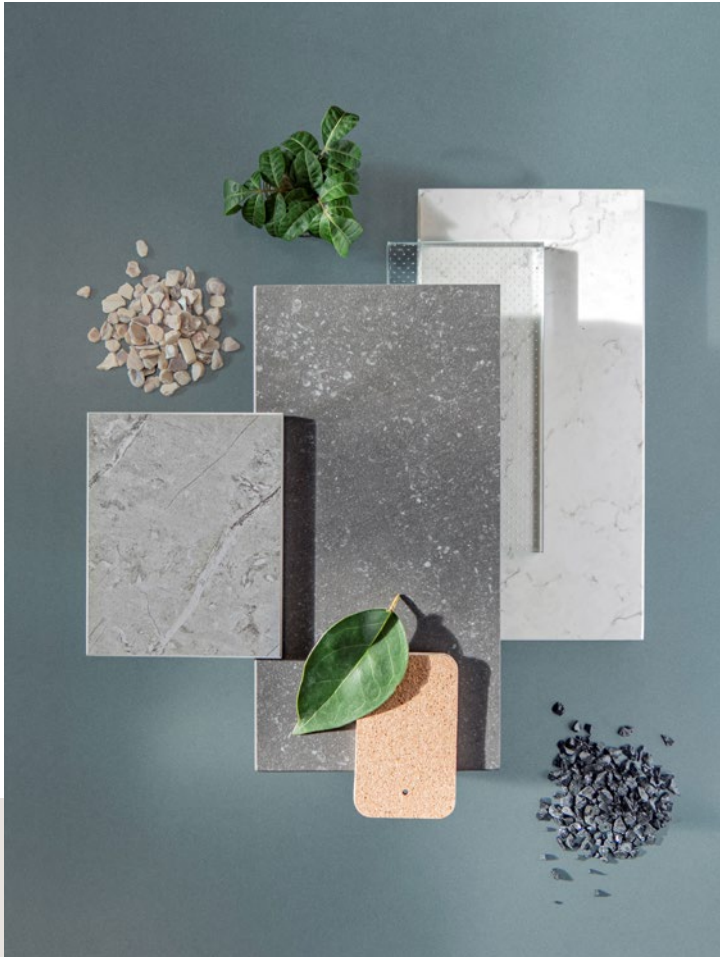

Shower trays with Dekton® Grip+ and Silestone®: exclusive and integrated bathroom designs with endless customisation possibilities.

Cosentino® offers an extensive collection of shower trays in the material of choice for the architect or designer, adaptable to any space. This is an interesting alternative to the traditional shower that simplifies installation and assembly.

Washbasins

And countertops with great versatility that suit any space. Sophisticated designs with maximum beauty and durability.

Silestone® washbasins are built with a unique and innovative design capable of living up to the most demanding creative projects. From washbasins integrated into the countertop to countertop washbasins, double basins, etc., everything is possible with a custom manufacture.

Colours and textures

New collections of innovative, on trend colours and textures, to create bathroom spaces full of originality and impact.

The Silestone® and Dekton® surfaces offer a wide variety of solid and veined colours, unique chromatic patterns and sensory textures to rediscover bathroom spaces.

Optimma format

Optimised for interior bathroom cladding: maximum use of the slab, easy installation and continuous design in a vertical format.

Optimma is the slab format measuring 2,600 x 1,000 x 4 mm from the Dekton® brand, which can be applied to any vertical cladding and create a continuous design, taking advantage of its full height, easy installation and minimum waste.

Custom design

All our products are manufactured to order. Some of them are available in the recommended standard formats, but they can be made to measure to suit the space and needs of each customer.

Total Integration

Visual and aesthetic continuity.
The same surface for all of your bathroom: floor, cladding, shower tray and washbasin.

The use of a single surface for all bathroom components allows for complete aesthetic homogeneity, thus achieving harmony, balance and spaciousness.

Applications for bathrooms

Thanks to their low porosity and high resistance to stains and scratches, Cosentino® surfaces and manufactured products allow any design to be freely created, guaranteeing maximum durability.

The variety of formats and thicknesses of Silestone®, Dekton® and Sensa by Cosentino® surfaces optimises their assembly in any project, facilitating their aesthetic integration with washbasins and shower trays in the same finishes.

Innovation in design

Dekton® is a sophisticated blend of more than 20 minerals extracted from nature. Its production process is the result of years of learning and inspiration in the manufacture of glass, cutting-edge porcelain tiles and quartz surfaces.

As a result of an exclusive sintering and ultra-compaction process, Dekton® presents a low porosity, which generates a surface with no micro-defects that cause tensions or weak points.

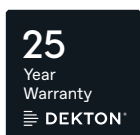

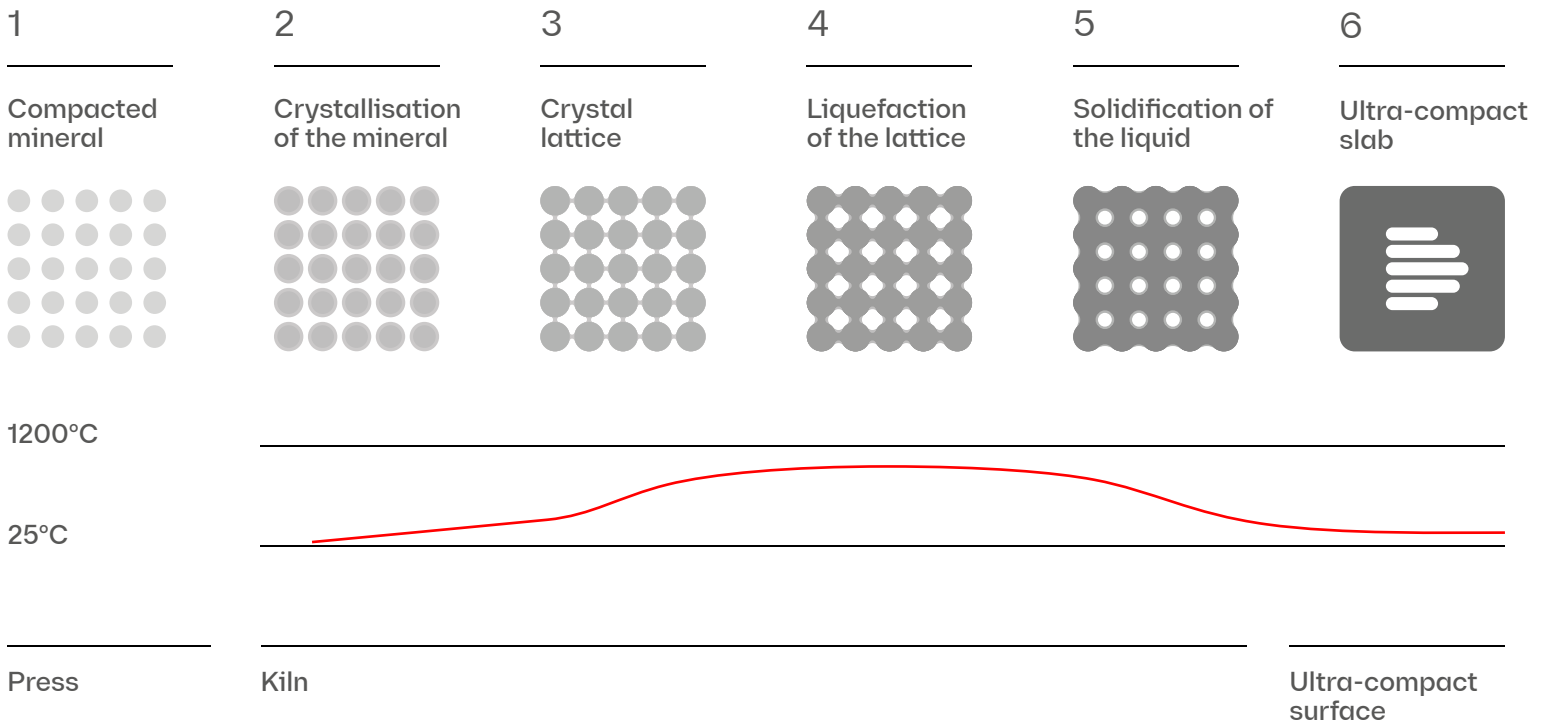

Sinterized Particle Technology

Dekton® uses in its manufacturing the exclusive TSP technology, capable of sintering mineral particles, causing them to bond, change and compact their internal structure. A unique and innovative technological process that represents an accelerated version of the metamorphic change that natural stone undergoes when subjected to high temperatures and pressure over thousands of years.

In the span of a few hours, Dekton® emulates what nature takes thousands of years to create, thanks to the exclusive TSP technology.

- The kiln is 180 metres long.
- Temperature reaches approximately 1250°C.
- The total time of the process depends on the thickness of the slab (about 4 hours).

Dekton®^R, high performance design

Dekton® Product features

Dekton® has all the technical features demanded of a highly resistant surface suitable for all types of interior and exterior residential design projects.

Low water absorption

Dekton®'s water absorption is negligible, and therefore is not affected by this type of movement of expansion.

Highly resistant to UV light

Dekton® is highly resistant to UV light and will not fade or degrade over time in any kind of outdoor application.

Superior mechanical resistance

Dekton®'s variety of thicknesses allow it to be used in applications where resistance to wind or impact are a project requirement.

Fireproof material

Dekton® can withstand high temperatures without burning, scorching or cracking. European Standard EN 13501 and ASTM E84 testing classifies ultra-compact surfaces as non-combustible.

Colour durability

Dekton®'s control of pigmentation and decoration in the manufacturing process provides better colour consistency from one slab to another, resulting in a long lasting product that will not fade over time.

Scratch resistant

Dekton® is one of the most scratch-resistant surfaces on the market. It has achieved a score of seven (7/10) on the Mohs scale of mineral hardness.

Dimensional stability

Dekton® expansion is minimal so it can be installed with thin joints between panels. These joints will keep their width in all conditions.

Resistance to freezing and thawing

Dekton® resistance to durability tests in freezing and thawing situations and its application in various weather conditions prove its high performance.

Abrasion resistant

Dekton® is even more resistant to abrasion than granite and porcelain, making it the ideal surface for façades or high-traffic flooring in commercial applications.

Maximum fire and heat resistance

Dekton® has been successfully installed on façades in areas exposed to high temperatures.

Easy cleaning and low maintenance

Most graffiti can be removed from Dekton® with standard cleaning products. As a result, maintenance costs are reduced.

Stain resistant

Dekton® is resistant to stains from a variety of sources so they will not be permanent.

DEKTON® SLIM

Designed by COSENTINO

High aesthetic value and performance in vertical cladding and furnishings.

Minimum thickness of 4 mm → Large format and performance

Dekton® Slim is the new, large format surface with an ultra-thin 4 mm thickness that offers unlimited design options and incredible ease of installation and transport. Ideal for bathroom and kitchen floors and walls, as well as all types of furniture.

01 → Large format and minimum number of joints

Its large format measuring 3,200 mm x 1,440 mm covers large surfaces, avoiding a large number of joints and in turn, dirt.

02 → Easy installation

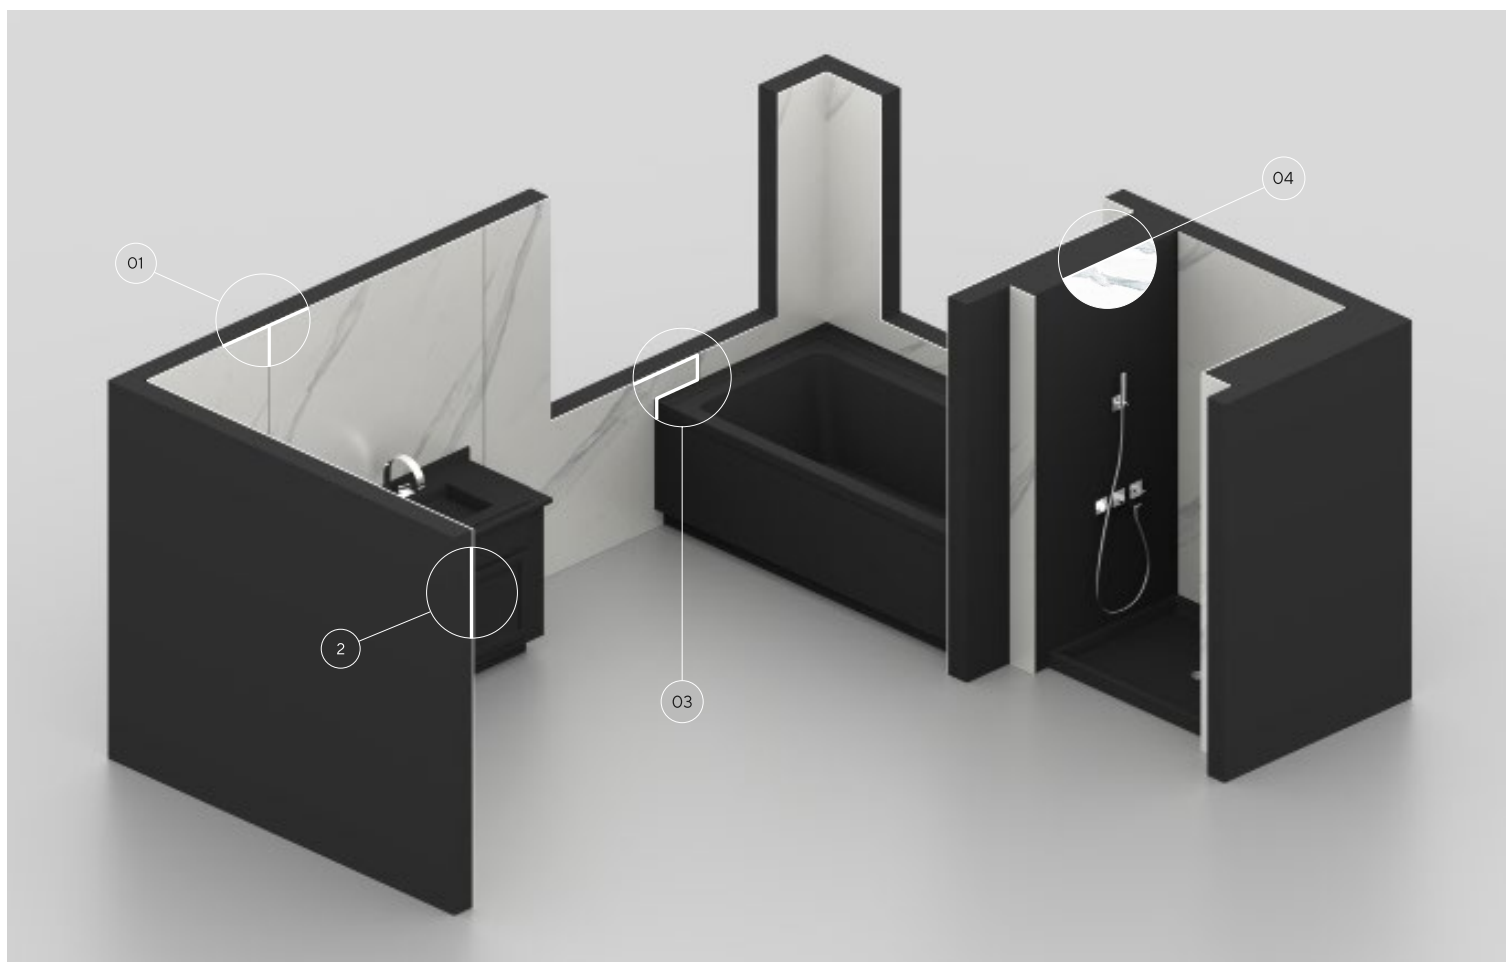

Thanks to its light format with an array of possibilities, everything just got a lot simpler. Its reduced thickness means that it can be cut quickly and adjustments can be made on site with tools for ceramic tiles.

03 → Limitless design

Dekton® Slim is easy to assemble and can be cut to size. It can be adapted to all spaces.

04 → Highly resistant to moisture

Ideal for bathrooms, Dekton® Slim offers cladding that is ultra-resistant to moisture and stains. A high-performance product that does not require any maintenance other than a damp cloth.

Dekton® formats

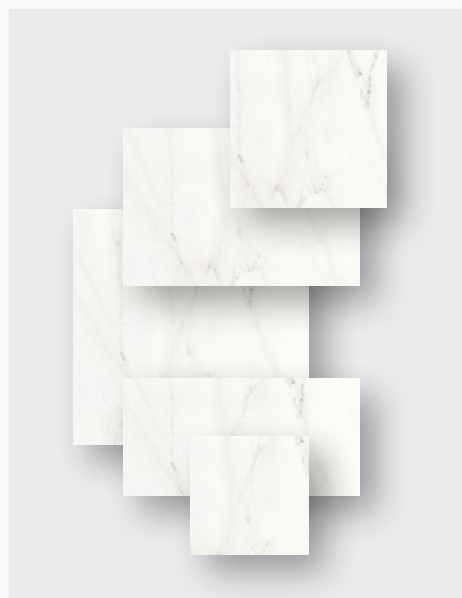

Adaptable and versatile.
For any space.

Thanks to its light format with an array of possibilities, everything just got a lot simpler. Its reduced thickness means that it can be cut quickly and adjustments can be made on site with tools for ceramic tiles.

Dekton® textures

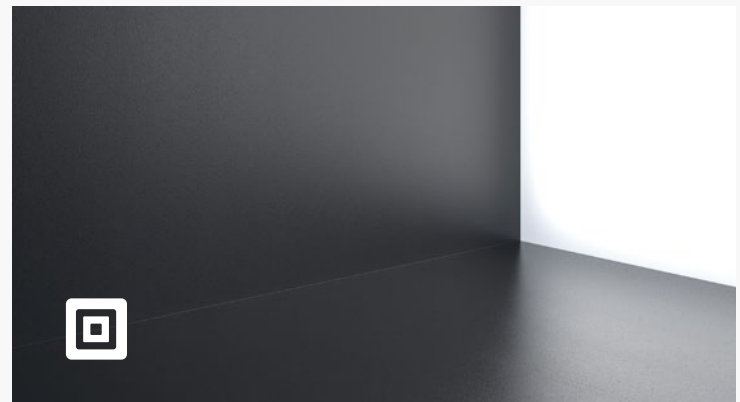

Different material sensations.
A rich variety of shades.

Dekton® comes in different textures so that the only limit is the imagination of the architect or designer: from an ultra glossy finish, to matt or velvety textured finishes.

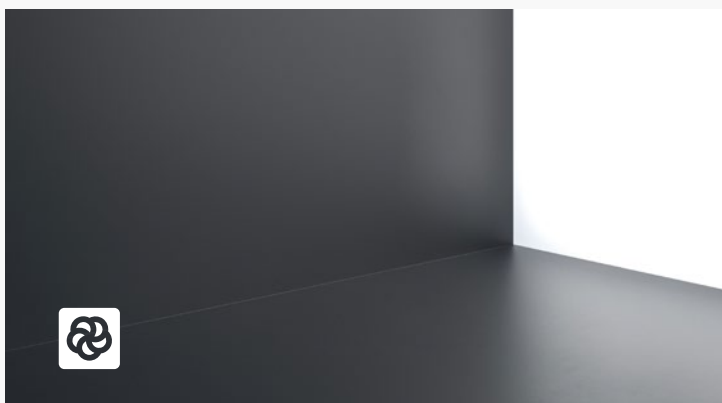

X-Gloss

A bright, dazzling finish achieved through mechanical polishing, without the need for glazes or other materials.

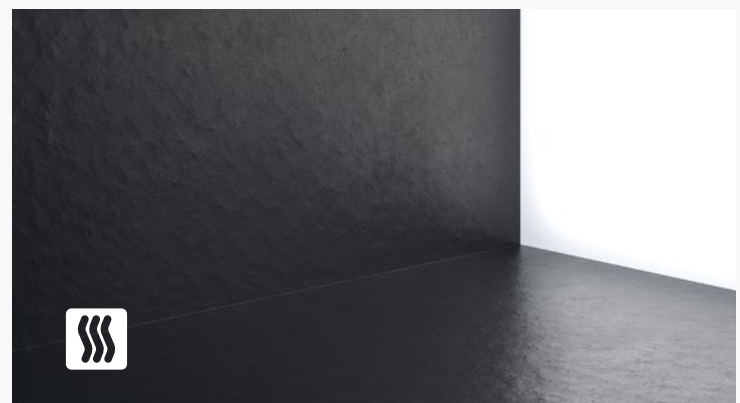

Matt

The matt texture aims for a natural, shine-free look, ideal for a harmonious and timeless finish. Most Dekton® products come in this finish.

Velvet

Velvet is Dekton®'s velvety texture. The materials chosen in Velvet create a feeling of warmth and comfort. This texture is perfect for classic colours, with veins.

Matt and Textured Velvet

Matt and Textured Velvet textures combine the warmth of velvet with the roughness of a textured, imperfect material. It is perfect for emulating the finish of natural stone.

Optimma

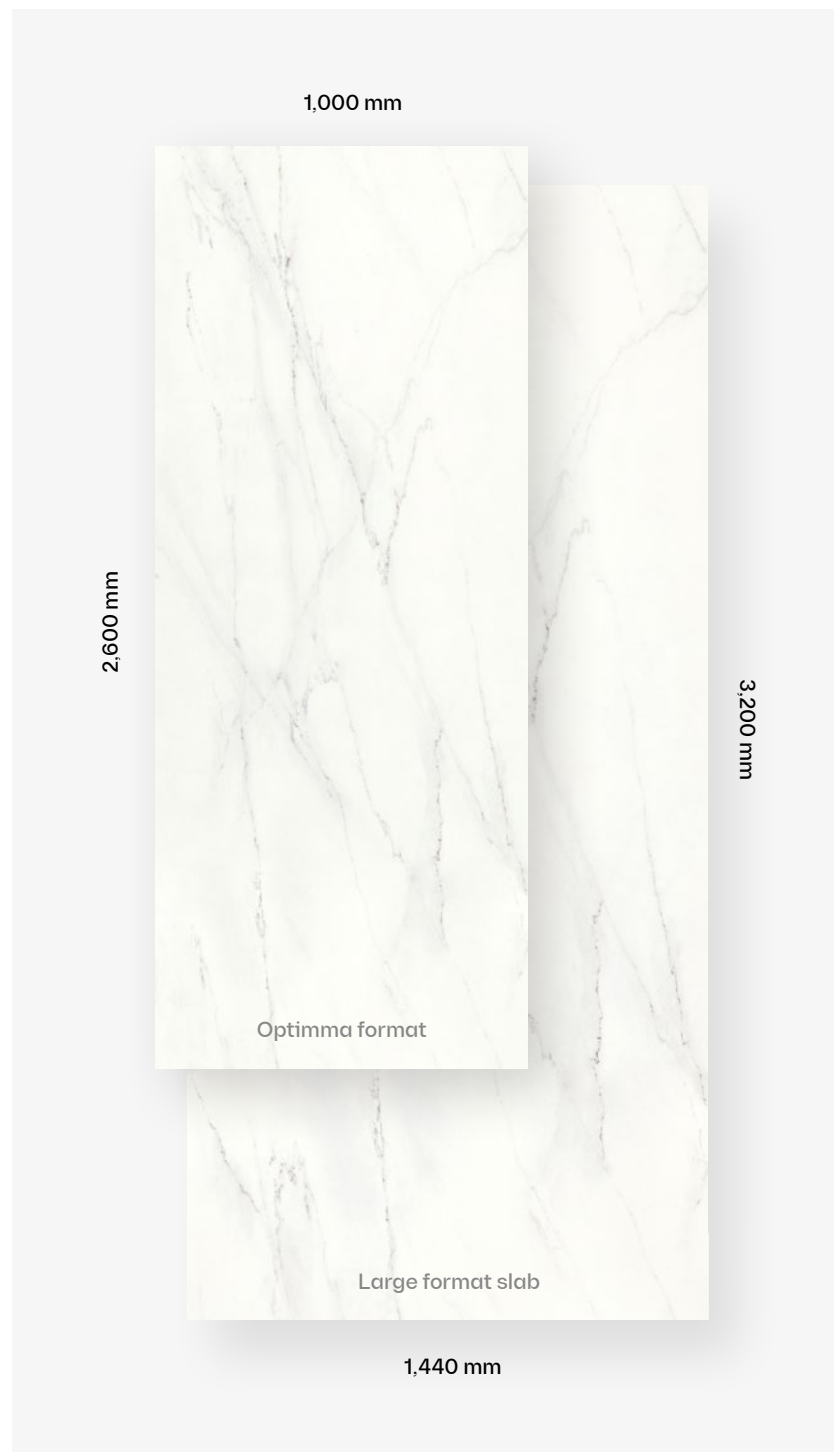

New optimised
Dekton® format.

The ultimate interior
cladding solution.

The Dekton® slab has been optimised taking into account its common applications to create a new format with better price, design, installation and handling. Here we present our first format of the Optimma family specifically designed for cladding: Optimma format 2,600 x 1,000 x 4 mm.

Optima Collection

The Optimma format is available in the following colours: Bergen, Laurent, Aeris, Rem, Kreta, Kelya, Nacre and Zenith.

**2,600 x 1,000 mm
in 4 mm thickness**

The slabs are created in 4 mm thickness, which gives it a lightness that allows for easy handling and, if necessary, it can be easily cut to adapt the product to all spaces.

Cost-effective

The dimensions have been optimised to the most common cladding standards, which allow us to reduce excess material and economise on the price of the piece.

Design with purpose

The slab has been created to maximise its overall height, making it much easier to cut for cladding.

Easy to install

The product is smaller and lighter, which makes it easier to transport and handle. Cutting can be done with simple tools. The piece is always delivered in mesh and with edges already bevelled.

Match design

The design has been conceived to place the slabs vertically, thus creating a continuous design.

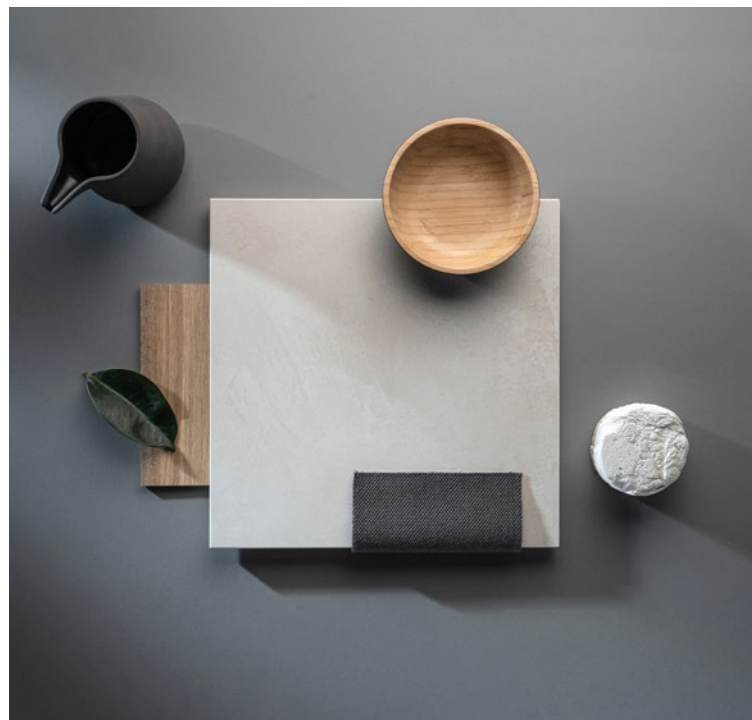

The beauty of handcraft

Kraftizen Collection

Our challenge has been to reinterpret craftsmanship with digital craft technology. Both technique and technology are complementary and feed back, refine and inspire each other.

The walls and trowel marks of yesteryear are transformed into canvases of millions of pixels, where tools and hands continue to shape beauty. Each trowel stroke, each twist of the wrist becomes part of an image, of a reinterpretation with no expiry date.

We have created a refined technique through technology shaping a durable surface that delights the five senses through textures and volumes, silky and extra matt colours that will clad floors, walls, tables, worktops and any timeless space.

Dekton® Nacre

Beauty is immersive hi-tech design

Onirika Collection

Onirika represents a journey. A detour in our dreams where boundaries between dreams and reality vanish.

'A collection that unites the poetic and unique beauty of stones harnessed by Dekton® technology, like those dreams where we observe and vaguely feel in control but only the deepest part of our mind truly understands.'

The collection is named after the lavish inspiration of two worlds conveyed in marble-inspired colours to captivate our eyes and to infuse any space with a feeling we understand but cannot explain in words.

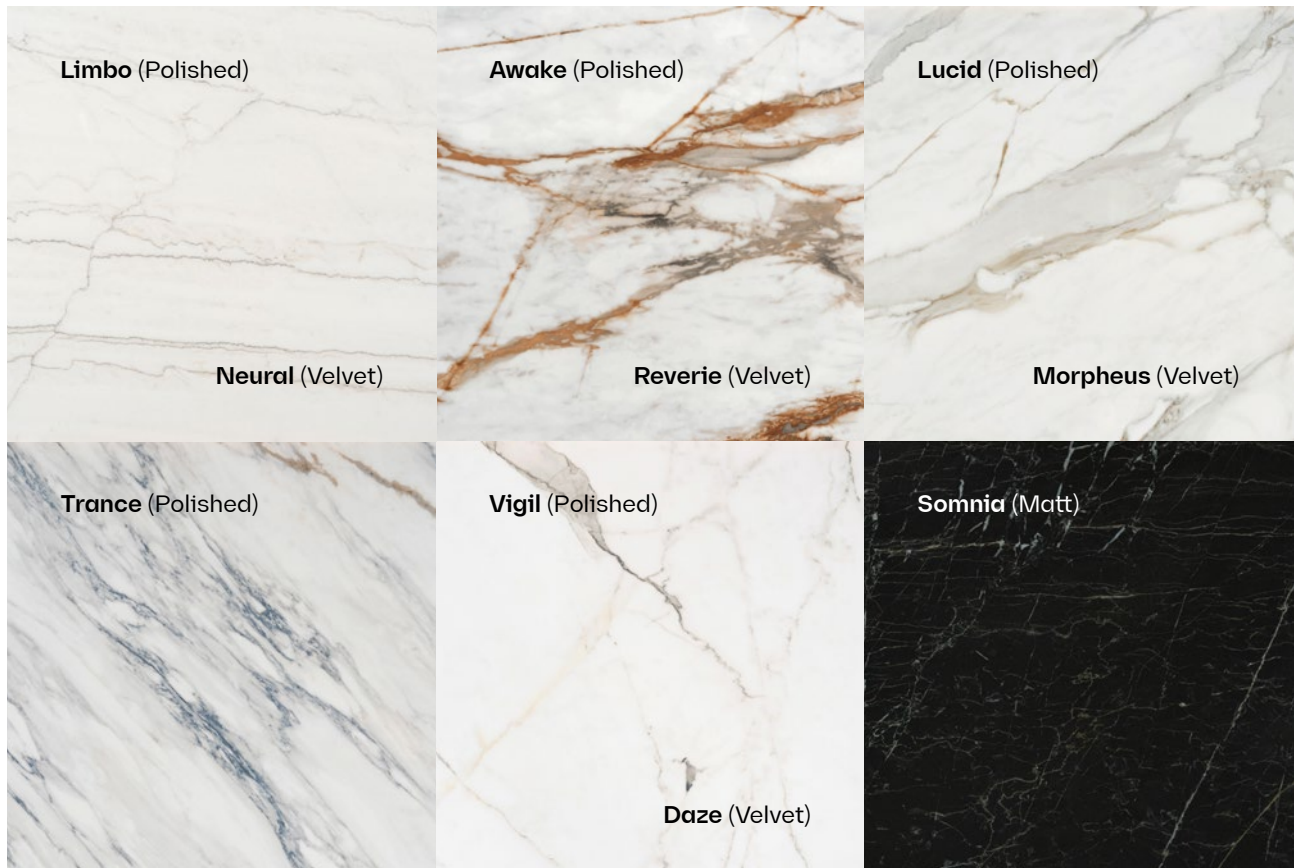

Designed by
Nina Magon

'Imagine sitting in a world of beauty, that blurs the division between reality and dreams.'

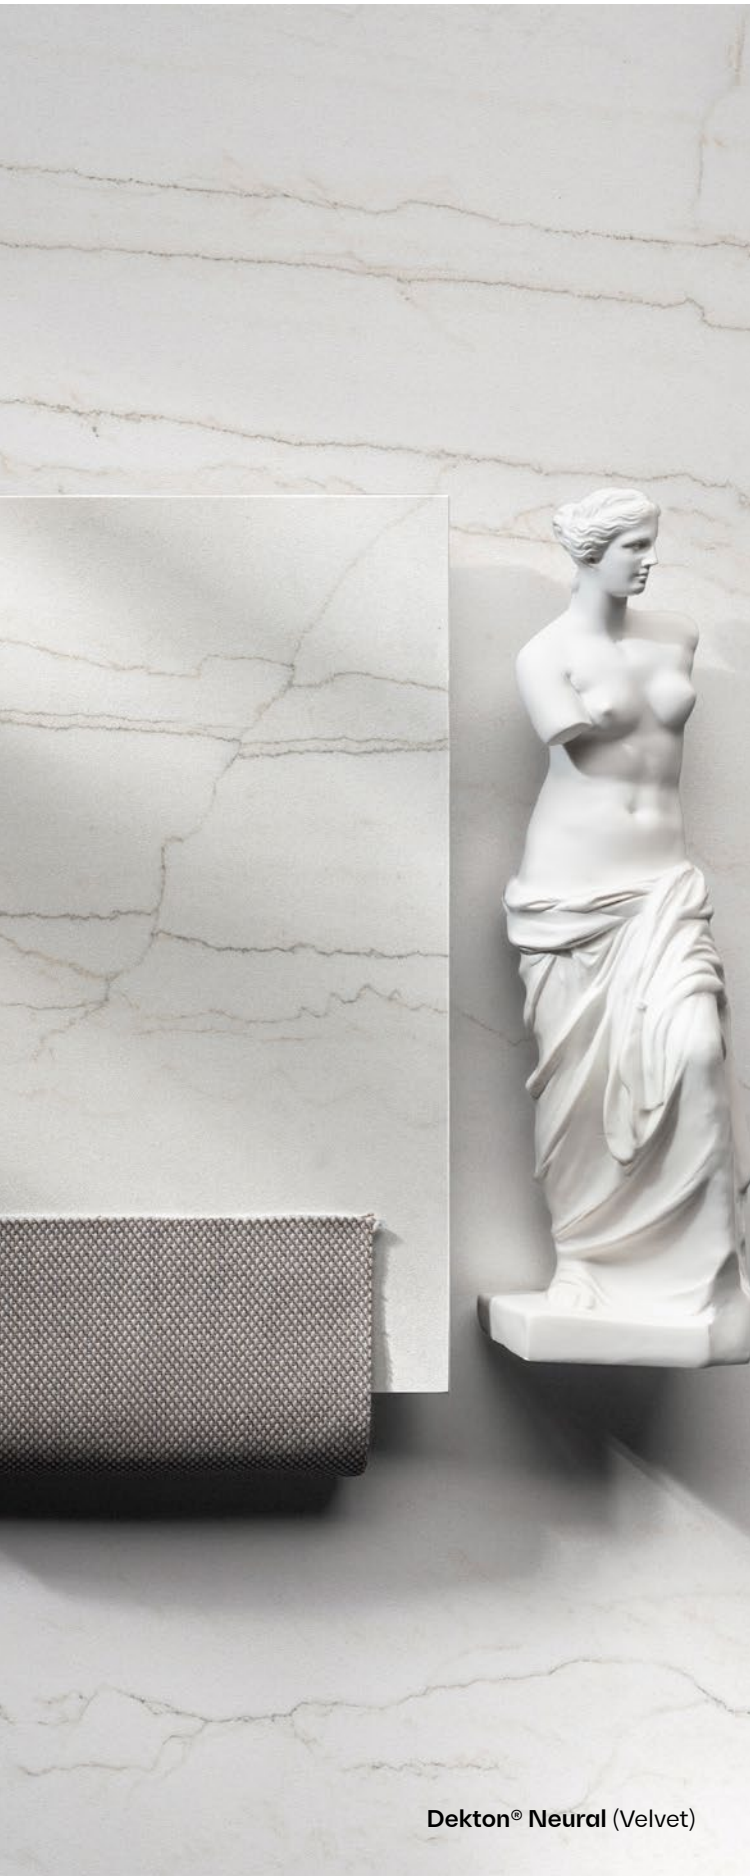

Nina Magon Studio, formerly Contour Interior Design, is a luxury design studio where architecture, interior design and construction blend seamlessly to deliver the world's most exclusive residential, hotel and spa projects.

The firm's innovative spirit is combined with exceptional service, ideas and personalised experiences for all its customers, based on the premise that luxury is not only elemental, but also part of its essence. At Nina Magon Studio they adhere to uncompromising standards and create exquisitely luxurious spaces through experimental and one-of-a-kind designs, which they tailor to the needs and desires of their customers and their imagination.

The ultimate mineral
HybriQ® surface.

Silestone® is a hybrid surface made of minerals and recycled materials designed to bring colour and texture to interior spaces.

Silestone® Advantages

Silestone® is extremely durable in kitchens, bathrooms and other spaces exposed to constant activity and use. In addition, it offers an unlimited range of colours and textures.

Silestone® has many advantages, including low maintenance, high resistance to stains and scratches, and a low fluid absorption rate. This resistance to fluids and its minimal joints make Silestone® the ideal solution for places where liquids are present. Silestone® is hard-wearing and allows prolonged use over time to last a lifetime.

The properties of Silestone® are the result of constant years of innovation that guarantee maximum hygiene and safety.

Acid and scratch-resistant

Silestone® is highly resistant to scratches and impacts, as well as to external agents and acids common in everyday kitchen use.

Stain resistant

Silestone® is a non-porous surface that is highly resistant to stains from coffee, wine, lemon juice, oil, vinegar, make-up and many other everyday products.

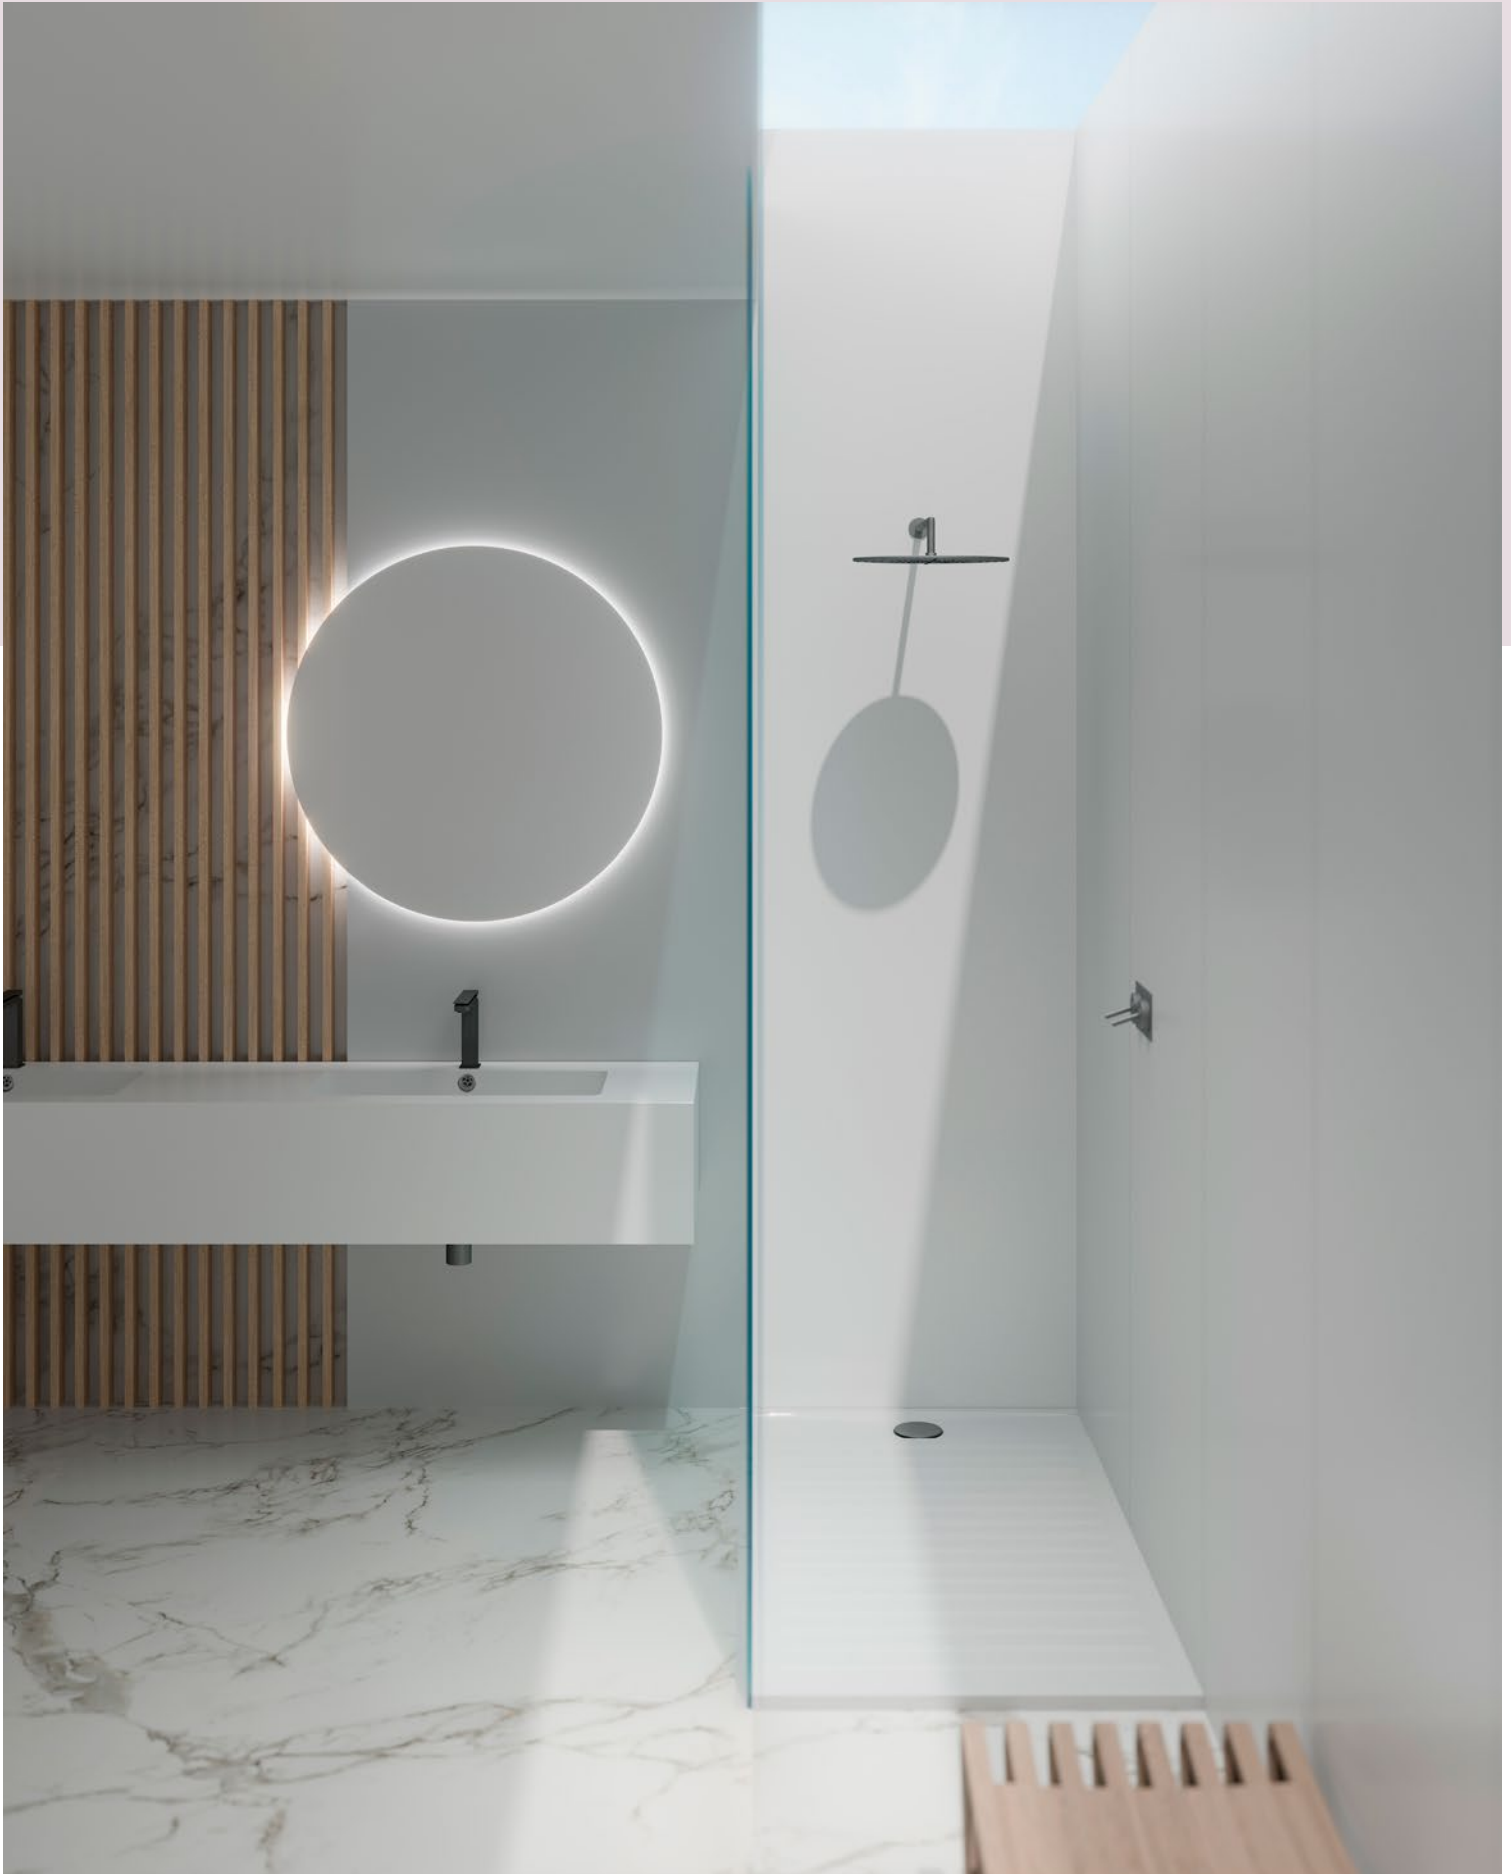

Impact resistant

The high impact resistance of Silestone® allows for the handling of hard objects (pots, trays, etc.) with total peace of mind.

25 year
warranty

Silestone® formats

Many possibilities for indoor applications.

Silestone® is available in slabs measuring up to 3,250 x 1,590 mm and in tiles measuring 300 x 300 mm, 400 x 400 mm, 600 x 600 mm, 600 x 300 mm and 600 x 400 mm. They are marketed in thicknesses of 12, 20 and 30 mm. Furthermore, different pieces can be combined to simulate thicker edges.

Large format

Jumbo slabs → 3,250 x 1,590 mm
Standard slabs → 3,060 x 1,400 mm

Jumbo slabs

Cosentino® offers Silestone® slabs in Jumbo format (3,250 x 1,590 mm max.). This format allows large surfaces to be created with a minimum number of joints, design versatility and improved hygiene. This optimises the use of the slab and minimises waste.

Cladding format

- 300 x 300 mm
- 400 x 400 mm
- 600 x 600 mm

- 20 mm
- 30 mm
- Custom thicknesses by combining different pieces together

Silestone® textures

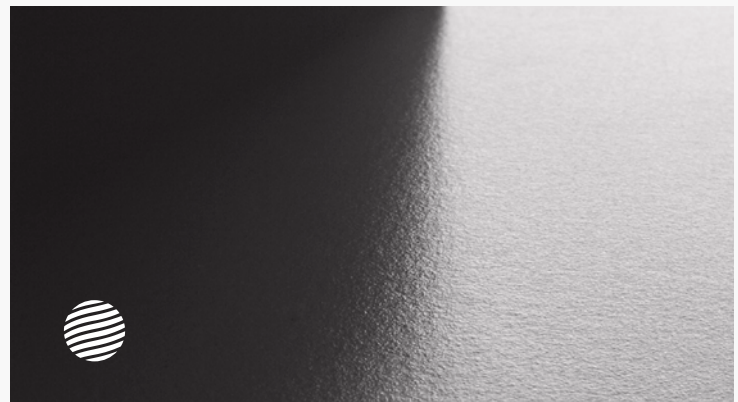

Surface sensory perception.

In order to adapt to all styles, Silestone® comes in different textures for any of its applications. Polished, Suede or Volcano are three possibilities that let your imagination run wild and provide you with the worktops, floors or walls with the texture you have always wanted.

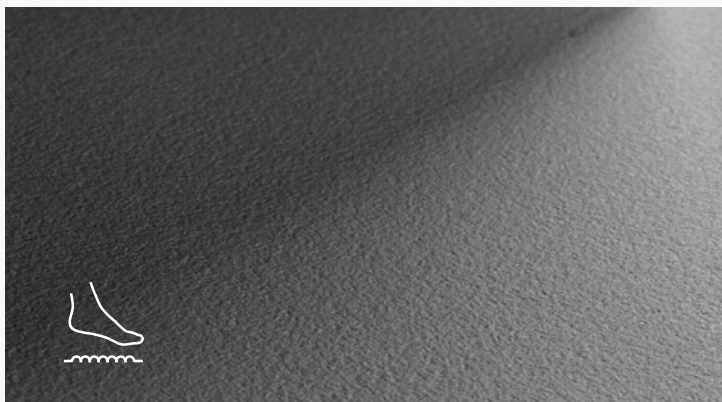

Polished

Extremely glossy and smooth texture with an intense and consistent colour.

Suede

A matt finish which offers a unique soft and pleasant feel.

Soft sandblasted (Anti-slip)

Surface available exclusively in the shower tray range to guarantee maximum anti-slip safety.

Mediterranean Colour Shades

Sunlit Days Series

An immersive and sensory journey through light and colour that takes us back to our roots and leads us to a more natural, sustainable and humane future.

We are launching the first Silestone® Carbon Neutral collection, a commitment to sustainability in which we reduce and offset the emissions of the manufacturing process with reforestation projects. This environmental commitment results in a partnership programme for the preservation of the seabed and our environment.

Sunlit Days is inspired by the evocative Mediterranean shades of a unique lifestyle.

SENSA

by COSENTINO®

Protected natural stone surface.

Sensa by Cosentino® is a premium, maintenance-free natural stone brought to you by Cosentino®, a world leader in the natural stone industry.

Sensa by Cosentino® is treated with a revolutionary stain-resistant treatment called SenGuard, and comes with a 15-year warranty against staining.

Applications

Sensa bathroom countertops. Stain-proof natural beauty.

Enjoy the design, durability and resistance of natural stone without worrying about stains. Sensa by Cosentino® quartzites and granites are treated with a revolutionary stain-resistant treatment that will protect your countertop and keep it looking as good as new.

Sensa by Cosentino® Treatment

Cosentino® applies an invisible, long-lasting treatment to quartzite and granite, which is chemically integrated into the material allowing it to breathe. This technology increases its powerful natural properties and prolongs its life.

The process changes the surface tension of the stone, enabling the material itself to prevent liquids from penetrating it.

SENSA
by COSENTINO®

Normal

Textures

Uniques shapes for one-of-a-kind surfaces.

The colours and textures of Sensa by Cosentino® features the patient and whimsical design of nature. Each of the available shades has a texture that produces different effects and sensations: suede, polished or caresse.

Gocce

The new generation of shower trays is here. A highly stylised design, with gentle slopes and a pleasant and delicate non-slip texture for your feet.

Made in Dekton®

Characteristics

- Extra-flat (28 mm) and ultra light (25 kg/m²) tray.
- Anti-slip treatment on the material.
- Available in various standard formats and colours.
- Possibility to adapt the dimensions of the standard shower tray with two-sided or four-sided* factory cut-outs.
- Prior analysis of the colour, other Dekton® Grip+ colours are available with a minimum order quantity of 60 pcs.
- Optional on-site cut-outs for easy adaptation.
- Installation flush with the floor or on top.
- Valve with siphon and stainless steel grid included.

Valve

Centred or offset (fixed)

Perimeter area

Flat surface with no slope for optimum positioning of the shower screen

Edge

28 mm straight polished edge for Dekton®

Shower tray*

Length: from 1200 to 1800 mm
Width: from 700 to 900 mm

* Customised product subject to certain fixed maximum and minimum measurements.

Surface

Dekton® Grip+ anti-slip finish for barefoot use (Class C, DIN 51097)

Available in a range of Dekton® Grip+ 8 mm colours.

Scan the QR code to check the colours

Exelis

A simple but robust design, with a four-way drainage system suitable for any need. Its textured finish gives the shower tray the highest anti-slip properties.

Made in Silestone®

 **silestone®**

Characteristics

- Standard 40 mm perimeter zone with elegant round corners of 60 mm radius.
- Possibility to change the position of the valve where needed (depending on the dimension of the tray).
- Optional cut-outs to suit space available on request.
- Optional side slot for shower screen installation.
- Installation flush with the floor or on top.
- Valve with siphon and stainless steel shower drain included.

Valve

Customisable positioning.

Perimeter area

40 mm flat surface for optimum positioning of the shower screen.

Edge

30 mm straight polished.

Wakka

Made in one piece, without vertical joints. Its single slope makes it functional and easy to fit into the bathroom floor, providing a simple, practical and elegant design.

Made in Silestone®

 **silestone®**

Characteristics

- Made in one piece, with no additional material that would require vertical joints.
- Designed for integration and continuity with the surrounding elements.
- Soft sandblasted strips for easy cleaning.
- Optional cut-outs to suit space available on request.
- Installation flush with the floor (recessed).
- Valve with siphon and stainless steel grid included.

Valve

Cosentino standard warranty letter

This Letter of Warranty (hereinafter, the ‘Warranty’) shall only be fully valid when the consumer has registered the project within 6 months of the purchase of the product, as indicated in the relevant section, and when the consumer submits the original invoice or purchase receipt (indicating the date of purchase and the name of the dealer of the product). The consumer shall send the defective product to COSENTINO GLOBAL S.L.U. (hereinafter, **COSENTINO**). In order to be effective, this Warranty must be registered online on the website www.cosentino.com. This Warranty is transferable

COSENTINO reserves the right not to offer the warranty service free of charge if the requirements set out in the previous paragraph are not met, or if the information provided by the consumer is false, incomplete or illegible.

This Warranty is intended for non-professional end users and shall be considered applicable for residential use, such as any building or facility for private accommodation, whether it is a single-family or multi-family dwelling.

End Products Manufactured by Cosentino

This section of the Warranty is limited to end products manufactured under any of the COSENTINO brands in the form of three-dimensional products, such as kitchen sinks, washbasins, bathroom countertops and shower trays (hereinafter, the ‘**End Products**’), and covers any manufacturing defects in such products for a period of **FIVE (5) YEARS**, from the date of purchase.

All this under the terms, conditions and limitations described for the rest of SILESTONE® or DEKTON® by Cosentino® products in this document and also available on the website.

This Warranty is only valid when the end products have been correctly installed (in accordance with the applicable regulations and the specific assembly instructions), and have been used correctly according to their intended application (Use, Care and Maintenance Guide).

Consumable items (rubber elements, seals, valves, etc.) are not covered under this Warranty.

Warranty Registration:

To register as a holder of this Warranty, it must be activated via www.cosentino.com. This website requires certain information for registration, including information relating to the point of sale and/or the marble supplier, as well as the customer. Therefore, we recommend that customers register directly with the point of sale or marble supplier. At the end of the registration, the customer may print this Warranty for their use.

In order to benefit from the Warranty, it must be registered within six (6) months of purchase.
